Measure: Number of children & young persons broken down by gender and age

Please note that these figures should not be divided by the adult population figures below to determine a proportion.

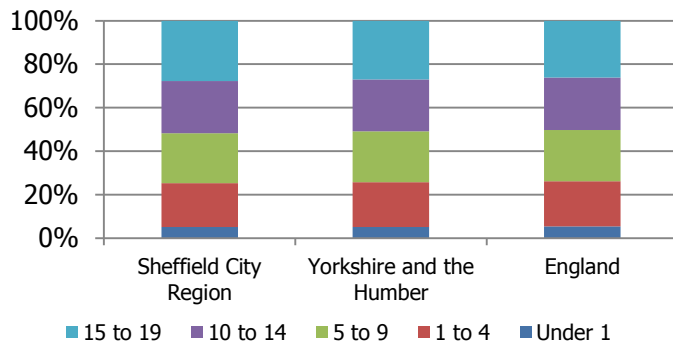

A proportion would need to be calculated using a total population figure, whereas the adult population only covers individuals aged 16+.

In addition to this, the two sets of figures are from different data sources (using different methodologies) and different time periods.

Section 3: Activity participation in Sheffield City Region

NB - Please note that the data in the following table is drawn from Sport England's Active People Survey (APS) and depending on sample size either the APS4 (the 2009/10 period) or the combined APS3/4 dataset (covering the years 2008/09 & 2009/10) is used. APS is used here in preference to Taking Part as it is designed to produce estimates for local areas. Regional and national estimates based on Taking Part data are also provided in the following tables. APS and Taking Part data are not comparable datasets, they may give different results due to methodological differences.
